Projects

Keep-Notes | ReactJs [🔗](#)

I have developed a dynamic and responsive to-do app using React, a popular JavaScript library for building user interfaces. This app allows users to effectively manage their tasks and stay organized.

The front-end of the app is built entirely in React, utilizing components and state management to create a seamless user experience. I have implemented features such as task creation, editing, and deletion, allowing users to easily add and manage their to-do items.

PixResize | HTML | CSS | Javascript [🔗](#)

I have developed an efficient and versatile image resizing application, designed to help users effortlessly resize their images for various purposes. This application provides a user-friendly interface and robust functionality to meet the diverse needs of image manipulation.

Using cutting-edge image processing algorithms, the application allows users to resize images while maintaining aspect ratios and preserving image quality. This ensures that resized images remain visually appealing and suitable for their intended use, whether it's for website optimization, social media sharing, or other digital platforms.

Education

Bachelor of Engineering in Information Technology, <i>Government Engineering College, Gandhinagar</i>	08/2021 – present Surat, India
---	-----------------------------------

Diploma In Informaion Technology, <i>Dr S & S S Gandhi College of Engineering and Technology</i>	07/2018 – 06/2021 Surat, India
--	-----------------------------------

Skills

HTML5	● ● ● ● ●
Proficient in writing clean, semantic HTML markup to structure web pages and improve accessibility.	

JavaScript:	● ● ● ● ●
Strong understanding of core JavaScript concepts, including variables, functions, loops, and conditionals.	

CSS3	● ● ● ● ●
Extensive knowledge of CSS3 properties and selectors to style web pages and create visually appealing designs.	

JavaScript Frameworks/Libraries	● ● ● ● ●
Familiarity with popular front-end JavaScript frameworks and libraries (e.g., React, Angular, Vue.js) to build robust and scalable web applications.
